**MODULAR PSU ALANTIK KAON600**

#### DESCRIPTION

The Alantik KAON600, together with its QUANTUM brothers, is part of the first series of all-new fully modular power supplies manufactured by Alantik. These series represent a real innovation, making the full-modular technology available at an unimaginable cost to date. The Kaon has 600watt power, has 8 modular outputs and is equipped with passive PFC. It has a single 12V circuit for more power for video cards. It is equipped with long cables of 60cm and 55cm + 15cm for articulated joint, suitable for assembly even in large cases.
