**DESCRIPTION**

The MOS221 monitor is the first monitor produced by Alantik.

The panel is of TN type with 16: 9 and the diagonal measure 21.5 ".

Although it is a monitor sold at a very cheap price, it has a frequency of 75Hz, rather than the 60Hz of its competitors, making it more suitable for prolonged use. The resolution is FULL HD 1920x1080 pixels.
