**MONITOR CORTEK 30" QFHD 2560x1080 200HZ**  
**MOS30W**

DESCRIPTION

The MOS30W monitor is part of the first series of high performance gaming monitors produced by Cortek. The panel is of the VA Curved R1800 21:9 type and the diagonal measures 30". The resolution is QUAD FHD 2560x1080 pixels. The frequency is of well 200Hz, a feature that makes it suitable for prolonged use even in the presence of moving images, that is in the gaming field, for this use in fact high operating frequencies are needed to prevent the Blur effect produced by the human body fatigues the sight. The monitor has a 4D gaming base with a 12cm rise and a built-in cable gland and is illuminated from behind with red light. Freesync and Overboost complete the gaming setup.
