CORTEK SARGAS 1700WATT POWER SUPPLY

DESCRIPTION

The SARGAS1700 is the flagship power supply for the new Cortek 2018-2019 serie.

It is the most powerful power supply ever made by Cortek. It has been realized in the gaming version with 14 modular ports and in the mining version with standard cables and fan always at maximum speed. The combined power declared is 1700watt and in our laboratory tests has reached, with voltage within the parameters ATX, the combined power of 1880watt, thanks also to a housing of 18.5cm and the excellent fan of 13cm.

The efficiency is very high: 90% efficiency at 50% load (850watt). It is therefore suitable for extreme use with several video cards and low power consumption.

These the includes cables : 20 + 4PIN, P4 + P4, 4xMOLEX, 4xSATA, 12x (PCI-E 6 + 2)
