CORTEK ASTRO GAMING CHAIR
CORTEK ASTRO (LARGE VERSION)**

DESCRIPTION

ASTRO is a very high-end gaming armchair with new features. New features: cervical pillow in foam, magnetic and adjustable/deformable by the user, decomposable armrests, integrated adaptable lumbar cushion.

The foam lumbar cushion is magnetic and deformable: it attaches magnetically to the backrest at various heights, this allows it to be positioned quickly, easily and extremely precisely in such a way as to have a perfect position that is not possible to achieve with traditional systems.

The lumbar cushion is large, it is integrated into the chair but, being able to tilt slightly, it adapts to the user's shape.

The armrests are large, they are rotatable and can be broken down in such a way as to have a part that rises, in this way they can be adjusted

so as to have half of the same armrest facing outwards or inwards: the position assumed by many users while playing or using the keyboard or other peripherals.

The Frog mechanism and class 4 piston allow it to support up to 180kg of weight.

Brand	Cortek
Name	Astro
Type	Gaming Chair
Color	Black
Cervical cushion	Foam, Magnetic and User Deformable
Lumbar cushion	Integrated and adaptable/tilting
Material	Synthetic fibre
Weight	25Kg
