FLASHFIRE JOYSTICK JOYCOB

PRO JOYSTICK

DESCRIPTION

COBRA is the flagship joystick of the FlashFire range.

It is a very high precision professional product, built with the highest quality materials, just pick it up to realize that it is a different object from a common joystick or any gamepad. Obviously indispensable in driving aircraft (planes, helicopters, ...) it can be used to precisely control any vehicle (figures, vehicles, ...).

It is equipped with 4-axis controls, has 29 buttons and external pedals can also be attached. It has a 32-bit ARM processor.

It has software for various settings: dead zone, precision, resolution, ... and can be updated via USB.

Base and lower part are made of metal.
