 BRAND **CORTEK QUANTUM KEYCAPS**  
 CATEGORY **CORTEK QUANTUM KEYCAPS**

GTIN This is a set of keycaps in Cherry-like format.  
 They are the same keys mounted on the Cortek Realm keyboard (Quantum version).  
 It is a very high quality product, the process is sublimation on the 5 sides of the button.  
 In the package we find 68 keys + 10 keys to adapt to larger keyboards + 4 thematic keys drawn on all 5 sides on the quantum theme: particles, wormholes and quantum mind.  
 The layout is ANSI, with US characters drawn above the keys and Italian characters on the front.  
 When paired with the Cortek Phantom Silent Switches, they offer particularly silent and extremely comfortable typing.
