CORTEK KEYCAPS SCIENCE
CORTEK KEYCAPS SCIENCE

DESCRIPTION

This is a set of keycaps in MDA format.
They are the same keys mounted on the Cortek Science keyboard.
It is a very high quality product, the process is sublimation on the 5 sides of the button.
In the package we find 87 keys (format for TKL keyboards) + 5 keys to adapt to smaller keyboards + 4 thematic keys drawn on all 5 sides depicting scientific topics (Einstein's energy/mass formula, DNA helix and stars).
The layout is ANSI, with US characters drawn above the keys and Italian characters on the front.
When paired with the Cortek Phantom Silent Switches, they offer particularly silent and extremely comfortable typing.
