DESCRIPTION

The Gammec GM3 is the new version of the tested GM1 and GM2.
In this latest version, while maintaining the winning characteristics of its predecessors, the chip was changed and the programmable A704 was mounted with the special software that can be downloaded from the Gammec website.
The software allows you to have 5 profiles + import / export, to set several functions: Fire, Office, Windows, Multimedia, Macro and to have loop or fixed lighting functions.
The DPI settings are with backlit key on 4 levels selectable between 1200-1600-2000-2400-3200 which can be combined with lighting in different colors.
