DESCRIPTION

The Gammec GP4 is a gaming mouse with 7 keys, backlit and with A704 chip programmable with the appropriate software downloadable from the Gammec website.

The software allows you to have 5 profiles + import / export, to set several functions: Fire, Office, Windows, Multimedia, Macro and to have loop or fixed lighting functions.

The DPI settings are with backlit key on 4 levels selectable between 1200-1600-2000-2400-3200 which can be combined with lighting in different colors.

The materials, the rubber-coated coating, the backlit laser logo and the central wheel are also excellent.
