ALANTIK MOST3N MOUSE WITH 4 BUTTONS

DESCRIPTION

The Alantik MOST3N is a PalmGrip mouse. Although it is a cheap mouse has features of great importance both in terms of precision and the materials used: in fact the precision ranges from 800 to 1600 DPI adjustable in four levels with the appropriate button and the surface of the fingers has a special rubberized coating, these features usually of a very different price. The technical features and the high quality keys make this product suitable for all types of users.
