MOUSE CTesports NOVA PIXART 3325 SENSOR
CTesports NOVA

DESCRIZIONE

The CTesports NOVA is a high performance gaming mouse. The structure is composed of two blocks that contain a third bright RGB and Rainbow in 16 million colors. The sensor mounted is the Pixart 3325 with resolution up to 5000 DPI hardware (and up to 10000 DPI via softWare). The mouse is completely programmable, there are both functions and macros that can be assigned to all 6 keys, both RGB and Rainbow colors (with dedicated software). The NOVA has a perfect balance and is suitable for users with any type of grip (palm, claw, ...), it also has two full rubber sides, a prominent feature in prolonged play situations where the rubber can hold grip even if the hands are particularly sweaty.
