**MODULAR POWER SUPPLY GAMMEC STORM600**

#### DESCRIPTION

The GammeC Storm 600 is the first fully modular GammeC power supply with a fan with effects in 256 RGB and Rainbow colors.

It is the first power supply on the market that, at low cost, is able to offer complete modularity and RGB and Rainbow lighting.

The GammeC Storm has 600 watt power, has 9 modular outputs and is equipped with passive PFC and single circuit on 12V for more power for video cards, and is also equipped with long cables of 60cm and 55cm + 15cm, suitable to assembly even in big cases.
