MONZA STEERING WHEEL
MONZA

DESCRIPTION

The MONZA steering wheel is the F1 type steering wheel from the FlashFire range.

FlashFire is the brand under which AsianGames, a Taiwanese company that produces gaming for third parties, distributes its products.

The robustness of the product and the quality of the materials are the first things you notice when picking up this product.

Compatibility is ensured for Windows, PS3, PS4, Xbox One, Xbox S and Nintendo Switch. We also remember that the manufacturer is a Sony licensee.

Double motor for vibrations and Hall Sensor technology ensure realistic driving behaviour.

The equipment is also completed by two robust and precise paddles and the possibility of adjusting various driving positions (from vertical steering wheel (F1) to horizontal steering wheel).
