**SUZUKA PREMIUM RACING WHEEL
SUZUKA PREMIUM**

DESCRIPTION

The SUZUKA PREMIUM steering wheel on the date of its release is the best performing in the FlashFire range. FlashFire is the brand under which AsianGames, a Taiwanese company that produces gaming for third parties, distributes its products. The robustness of the product and the quality of the materials are the first things you notice when you pick up this product. The steering wheel is also equipped with a 6-speed gearbox + doubler (useful if you drive vehicles with many gears, such as trucks) and 3 metal pedals. Compatibility is ensured for Windows, PS3, PS4, Xbox One, Xbox S and Ninendo Switch. We also remember that the manufacturer is a Sony licensee. Double motor for vibrations and Hall Sensor technology ensure realistic driving behavior. The equipment is also completed by two robust and precise paddles and the possibility of setting 270° and 900° rotation.
